CAUSE

The human body is designed to be healthy. The primary system in the body which coordinates health is the nervous system. The healthy function of every cell, every system, every organ is dependent upon the integrity of the nervous system. The bones of the skull and vertebrae of the spine house and protect the central nervous system.

From the birth process until the present, events have occurred in your child's life which may have caused interference and damage to this delicate system. Physical, emotional, and chemical stresses common to our contemporary lifestyles can result to misalignment and damage to the spinal column. This interference is called the Vertebral Subluxation Complex.

This form will help reveal the causes of Vertebral Subluxation which interfere with the optimal function of your child's nervous system and therefore impair your child's health and well-being.

Vertebral Subluxation Assessment

1. Has your child been checked by a Doctor of Chiropractic? _____ Who? _____

Were x-rays taken? _____ Who is your regular pediatrician? _____

2. Experts around the world agree: the birth process as we know it may cause extensive neurological trauma, damage and even death to the infant:

Did you have an ultrasound during this pregnancy? _____ Frequency _____

Place of birth: Home Birthing Center Hospital

Provider: Midwife OB/Gyn Other _____

Type of birth: Vaginal C-section Was anesthetic used? _____

If so, what type? _____ Was labor induced? _____ If yes, why? _____

What position did you give labor in? Squatting On back

Birth Trauma: Doctor assisted Twisting/Pulling Vacuum Extraction Forceps

Newborn Trauma (medical procedures and tests): _____

3. Repeated studies are now informing us breast-feeding develops strong and healthy immune, neurological, and digestive systems. Did you breast-feed your child? _____ How long? _____

Was your decision supported by your health care provider? _____

4. According to the National Safety Council approximately 50% of infants have fallen onto their heads during their first years of life. Another study reveals 1/4 million children are injured in playgrounds annually. Can you recall any such jolts, falls, or traumas to your child?_____ Please describe_____

Any fractures or dislocations? _____

5. Which sports does your child play?_____

6. Other than 5 hours a day spent sitting in the classroom, does your child spend additional prolonged time sitting?_____ Is it in front of computer or TV?_____

7. How would you rate your child's diet?_____ Does your child consume artificial sweeteners?_____ Fluoridated water?_____

8. Circle any of the following your child has suffered from:

Colic / Irregular Sleep Patterns / Night Terrors / Seizures / Tantrums / Ear Infections Allergies / Asthma / Headaches / Poor Digestion / Repeated Infections or Colds / ADD / ADHD / Bed Wetting / Learning Disorders / Emotional Disorders / Other_____

9. How often has your child been treated with drugs?_____

Were you informed of their adverse reactions?_____ If it was an antibiotic, was your child cultured for its use?_____ Is your child currently on any medications? _____ Please list_____

Any surgeries?_____ List them _____

10. The child's immune system like all other developing systems of the body is both intricate and delicate. It strives for a state of homeostasis and balance in the body. Long term, adverse effects from interfering with this process with artificial immunizations is just being uncovered.

Was your child vaccinated? _____ Were you adequately informed of the risks of vaccinating your child?_____ Did your child experience any behavioral, emotional, or physical changes within 3 months of any shots?_____ Describe_____

CORRECTION of SUBLUXATION

Today we are becoming more aware of how current technological lifestyles and practices expose our children's nervous system to continuous stresses. These result in Vertebral Subluxations.

Current scientific research is showing the direct relationship between the function of the nervous system and the immune system function. The integrity of the nerve system is therefore imperative to a healthy immune system in your growing child.

Now your child has the opportunity to have a spinal analysis by a Doctor of Chiropractic, the only health care provider qualified to locate, analyze, and correct the Vertebral Subluxation Complex. Correction of the subluxation with the chiropractic adjustment is the beginning of greater health and well-being for your child.

AUTHORIZATION FOR CARE OF A MINOR

I hereby authorize Dr. William J. Koppari to administer care as deemed necessary to my child, and understand that I am personally responsible for payment of all fees incurred from such care.
